

Our identity.

What we do, how we think, what drives us.

The energy revolution is without doubt one of the greatest challenges of our time. Already more than ten years ago, we at bmp realized that it takes courageous ideas and people who get down to work. As a pioneer in the biomethane industry, we have therefore set out to make the world a bit greener with reliable products and customized offers.

And together with our partners we want to achieve much more. To this end, we are resolutely moving forward, finding new ways and developing efficient solutions for the energy supply of tomorrow. In doing so, we will overcome not only portfolio but also country boundaries. At the same time, we are consistently developing the tried and tested further. Our mission: We put green gases on course for international growth!

Our most valuable resource is in each and every one of us: in the heads of our bmp team. Our knowledge is the force that drives us in the continuous development of our business areas. By sharing and intensifying it with each other, we create the basis for our growth and can really make a difference. And that is our great vision:

Together with our partners we act for a CO₂-neutral and economical energy future with green gases.

We always remain true to ourselves. For four very valuable reasons:

Conviction.

We firmly believe in a CO₂-neutral energy supply. This is why we have made the energy revolution our mission and see it as our responsibility to consistently drive it forward every day with our range of services. To make the future better than today.

Energy.

bmp stands for sustainable energy. This applies not only to our products, the green gases, but also for everyone on our team. We invest all our know-how and experience in new ideas for individual energy solutions. Efficient and 100% green.

Foresight.

We do not simply take the fastest route. With courage and prudence, we like to think around the corner and three steps further to find the best solution for our customers and our climate. Not only for now, but also for tomorrow.

Partnership.

We are there for each other, our customers and suppliers. Honest and fair – we stand by this at all times. At the same time, we treat everyone impartially and at eye level. This is the only way we can act successfully together for a green future.

We don't have to think about that for long. It is simply a matter of course for us.
